For all your agricultural needs

Since the launch of the Physiokey for Equine use we have had an amazing response and results. It treats horse and rider via neurostimulation and is non invasive and pain free. It is simple to use and because it puts the animal/human in a parasympathetic (receptive to treatment) state it can be used on the most nervous of animals. If you would like to have your horse treated or to learn more about this exciting product head over to the NS Health web page and FB page and also to the Physiokey Equine Group FB page. For information on when I will be in your area please feel free to call and have a chat. Treatment areas showing huge results are those difficult to treat by other methods - sacro, abductor and sacrum muscles especially. There are some amazing videos and testimonials on the FB equine page
